

Peer Review - Final Feedback request

Feedback Notes:	SLACK member	Status
On guided session the initial start video still plays after hitting submit	Neringa	Fixed
Make more contrast in colour for content (use hex instead)	Neringa	Fixed
Integrating links on my README to avoid unsightly format	Neringa	Fixed
Manipulate the screen display on each individual screen in your responsive image test	Neringa	Fixed
Include people's GitHub accounts on their profiles	Neringa	Fixed
Consider rename documentaiton to wireframes, as this can hold wireframes, color palettes and other things for your readme. You even have two folders doing the same thing (documentation in assets and references)	Eventyret_mentor	Fixed
Consider your Table of content to be cleaned up and make it a easier to read now its a list with number with no references (so why have numbers)	Eventyret_mentor	Fixed
Consider make tech used more default, just listing the langauges, frameworks libraries and tools used. (As in youtube is NOT a tech just because you added a youtube video)	Eventyret_mentor	Fixed
All testing images are broken	Eventyret_mentor	Fixed
Your markdown should be imporved as you should not have floating urls}	Eventyret_mentor	Fixed
Consider rewrite your deployment as no offence but it looks horrendus and hard to follow. (think if its your first project and somone had to tell you how to do it, step by step hold their hand)	Eventyret_mentor	Fixed
Consider remove your integrity and crossorigin not needed for MS2	Eventyret_mentor	Fixed
Include the design process in the write-up	Neringa / SAML	Fixed
Hide the links in the References section	Neringa	Fixed
Move the documentation from the assets folder into the route directory	Neringa	Fixed
Replace JQuery file with CDN (as it's faster) - works, but seems slower with CDN	Eventyret_mentor	Fixed
Consider naming variables (cwhite) what does the c stand for? - stands for count	Eventyret_mentor	Fixed
<p> instead of 	Eventyret_mentor	Fixed
Consider use font-awesome css (If you are using gitpod you can do !bcdn to use my plugin to generate boiler plate all ready to go. (for Vscode you can download it)	Eventyret_mentor	Fixed
row wont work without containers (footer is an example)	Eventyret_mentor	Fixed
Look at the sequence of the accordion elements	Eventyret_mentor	Fixed
Consider use one round trip with bootstrap, jquery, font awesome. ---????	Eventyret_mentor	Fixed
Get to the cards and have a look at the sequence	Eventyret_mentor	Fixed
Don't do inline styling in HTML - this is critical - Removed inline styling	Eventyret_mentor	Fixed
Things that do not change should be CONST (never use VAR - only CONST or LET)	Eventyret_mentor	Fixed
Declare all variables at the top, not as I go (for easier access)	Eventyret_mentor	Fixed
Consider using class instead of ID when hiding things for less code - Class were used for the tick icons, but can't be used for individual hats. ID's are required due to count. Add commentary into README!	Eventyret_mentor	Fixed
If you are using jquery consider use it for other things you (like add class or remove class, display/hide etc - Use JQuery where possible, the rest working with vanilla JavaScript	Eventyret_mentor	Fixed
Consider reuse functions (see example below) - Condense the functions so you use less lines of code	Eventyret_mentor	Fixed
Above is a code that saves your 28 lines of codes into 3 lines :slightly_smiling_face: JS is about REUSE things - Be more efficient with the code	Eventyret_mentor	Fixed
Insert a Cheat sheet image into the modal for ease of reference with less patient users	SAML	Fixed
Fix links to README contents which are not working	Dante	Fixed
Look at how Neringa structured her CSS.	Neringa	Fixed
Consider to use jsDoc js comments (@Neringa became a master in this so do ask) - CI Tutor support advised that this was not a requirement for the course.	Eventyret_mentor	Skip
